

Title

References

References must be listed at the end of the paper. Do not begin them on a new page unless this is absolutely necessary. Authors should ensure that every reference in the text appears in the list of references and vice versa. Indicate references by (Van der Geer, Hanraads, & Lupton, 2000) or (Strunk & White, 1979) in the text.

Some examples of how your references should be listed are given at the end of this template in the 'References' section, which will allow you to assemble your reference list according to the correct format and font size.

Guide:

Reference list

References to other publications must be in Harvard style using author and date.

References should be gathered together at the end of the main body of the text in alphabetical order by author.

- ▲ Where there is more than one reference from the **same author(s)** in the **same year**, references should be identified by suffix letters e.g. (Pearce, 1995a).
- ▲ References should be made only to works that are published, accepted for publication (not merely 'submitted'), or available through libraries or institutions. Any other source should be qualified by a note regarding availability.
- ▲ **Footnotes** should be avoided, but any short, succinct notes making a specific point, may be placed in number order following the alphabetical list of references.

Citing in the text

References should be cited in the text either in brackets, e.g. *Earlier studies (Pearce, 1989) showed...* or using the name as part of a sentence, e.g. *Pearce (1989) states...*

- ▲ For **two** authors the format is: (Huberman and Miles, 1998).
- ▲ For **three or more** authors: (Dwyer et al., 2000).
- ▲ **Groups of references** should be listed first alphabetically and then chronologically, e.g.
▲ (Crompton, 1979; 1999; Fakeye and Crompton, 1991; Gunn, 1988).
- ▲ For **quoted material** a page number is required, e.g. [Pearce, (1989), p.22].

Personal communications - emails, conversations, letters - should not be in the reference list, but may be mentioned in the text, e.g. (interview with the James Green, University of Southern California, 12 November 2008).

Any **additional reading** not cited in the text should be in a separate list.

Please note: for the *International Journal of Private Law* and the *International Journal of Public Law and Policy* **only**, use the Numeric Referencing System with numbers in the text and a numerical list of references at the end of the paper, e.g. ...*Smith's* [1] *research supported...*
